Playstation - Junior Sound Designer

I am applying for the position of Junior Sound Designer. Please use this and my CV for consideration.

I have substantial sound design experience working with digital plugins like Massive, Monark, Prism and Reaktor. Also I have experience working with Nord equipment such as the Electro 6 and Stage 3. I also have 15 years of experience playing multiple instruments and in depth music theory knowledge.

I have experience working in Pro Tools and the UAD digital console. I am currently studying at SAE Institute London on an Audio Production degree and am constantly adding to this knowledge.

I have a massive passion for video games on a plethora of platforms. From League of Legends and the Civilisation series on PC to Borderlands and Dead by Daylight on the PS4. I actively listen to and learn parts from music scores from video games such as Taliyah's champion theme (from LoL) and Sins of the Father from MGS V.

Examples of my work are on my website as well as more information about me. I believe that I can more than fulfill the expectations required for the job and am capable of quickly learning any additional skills required on the job.
